1983e

"A Partitioned Recursive Algorithm for the Estimation of Dynamical Parameters and Initial-Condition Parameters from Cross-Sectional Data," D. W. Porter, M. D. Shuster, B. P. Gibbs, and W. S. Levine, *Proceedings, 22nd IEEE Conference on Decision and Control*, San Antonio, Texas, December 14–16, 1983, pp. 596–603.

The continuation of 1983b. This work presented a useful result for calculating the cross-Fisher information between Markov parameters and biases.

Succeeded 1983b.
